1. Welcome

This PDF is drawn by TPdfViewer with PDF.js: each page is drawn as it scrolls into view, at a zoom that fits the width, a whole page, or a percent.

2. Pages and zoom

The toolbar shows the page you are on; type a page to go there, or use previous and next. Zoom in and out, or choose a fit.

3. Download

Download saves the file, and open in a new tab shows it in the browser.
